COMMENTS

Spacious, roomy and functional interior, far superior to other yachts in its class. The steering is positioned vertically, allowing for precise and comfortable navigation.

The sterndrive engine increases the space available on board, in addition to enhancing the elegance of its lines.

The CX250i model is a concentration of design and comfort, highlighted by the attention to every detail: from the craftsmanship in the finishes and details, to the materials and color combinations.

The bathing platform is a practical passageway and the preferred access to the sea, in addition to being an element that provides elegant and sophisticated shapes, while the sterndrive engine minimizes the visual impact.

It is perfect for those who enjoy the sea in total comfort, without sacrificing functionality, performance, efficiency and the Italian style characteristic of Christian Grande.
