COMMENTS

Invictus GT320 is positioned exactly between its sisters in the series, GT370 and GT280, combining their predominant features: design, comfort and performance. It can be equipped with a single engine, like the GT280 model, but it is also the smallest of the Invictus range to be able to incorporate a twin engine, like the GT370.

The balance of the volumes and the elegance of its lines provide a distinctive perception of beauty in every detail. Its dimensions do not forgo the intention of matching the level of luxury of larger vessels.
